Resultant

Partners with Purpose DELIVERING OUTCOMES, TOGETHER GEN AI HHS

Who is Resultant?

We're an outcomes-focused consulting firm committed to helping clients make technology a strategic asset and use data to guide better decisions. But we're not just data and tech experts; we are problem solvers and industry experts who work alongside our clients to help them achieve their mission.

We take the time to deeply understand goals and roadblocks to drive toward outcomes that serve organizations, people, and communities.

Resultant Health and Human Services

CONNECTING DATA ACROSS GOVERNMENT AGENCIES, PROVIDERS, COMMUNITY-BASED ORGANIZATIONS, AND CORPORATIONS TO IMPROVE POPULATION HEALTH

- Not a typical consulting firm full of generalists with only life-long consultants who outsource to temporary contract staff. Instead- we hire industry leaders from government, healthcare and tech.
- We don't overcomplicate solutions that cost excess time and money. Insteadwe creatively find ways connect data so you have more visibility into an issue and have real-time and predictive analytics you can act on.
- We have always served state HHS governments, not just during the pandemic.

Resultant's Health and Human Services (HHS) Practice

CONNECTING DATA ACROSS GOVERNMENT AGENCIES, PROVIDERS, COMMUNITY-BASED ORGANIZATIONS, AND CORPORATIONS TO IMPROVE POPULATION HEALTH

INDUSTRY FOCUS

- Public Health
- Health Related Social Needs (HRSN)
 / Social Determinants of Health (SDoH)

- Health Data Organization Maturation
- Program Outcomes Analytics
- Health Information Exchange
- Child Care Connection Platform
- One Health Surveillance | © Resultant

Proposed Solution for CalHHS

ADVANTAGES TO OUR APPROACH

Future-Ready and Scalable

User-Friendly and Secure

Tailored approach for CalHHS

Advanced Custom Al

CURRENT STATE

- **1. Fragmented data:** Siloed information in 12 departments and 5 offices within CalHHS makes it difficult to have real-time visibility of issues and leverage predictive analytics for proactive approaches and record linkage between department platforms.
- 2. Inefficient access: Difficult to connect Californians to childcare, healthcare, behavioral health services, social services, and homeless shelters with wrap around services.
- **3. Manual processes:** Many legacy systems that need cloud, automation, and mobile capability to reduce burden on limited workforce.

SOLUTION

Al Resource Navigator

- **1.** *AI-Driven Platform:* Centralizes shelter and service data, providing real-time insights into availability and demand.
- 2. *Empowers Local Providers:* Allows communities to make data-driven decisions for efficient resource allocation.
- **3.** Unified Care Exchange: A Community Information Exchange system to connect Californians to services and provide predictive analytics to target high risk areas.
- 4. **Privacy and Security:** Ensures data governance while offering a human-centric approach to service management.

Data Governance, Security and Compliance

Right-sized Phased Approach with accelerators

NEW REALITY

- 1. Faster Access to Care.
- 2. **Proactive** State, County and Provider Resource Management.
- **3.** *Improve* the Social Determinants of Health for Vulnerable Populations.
- **4.** *Maximize* limited staffing resources to highestrisk locations.
- 5. **Real-time** visibility of emerging threats for policy and operational decisions.

MEASURES OF SUCCESS

Reduced Time to Access and Utilize Resources

Enhanced Outcomes and Recovery Opportunities

Improved Placement and Care Coordination for Californians

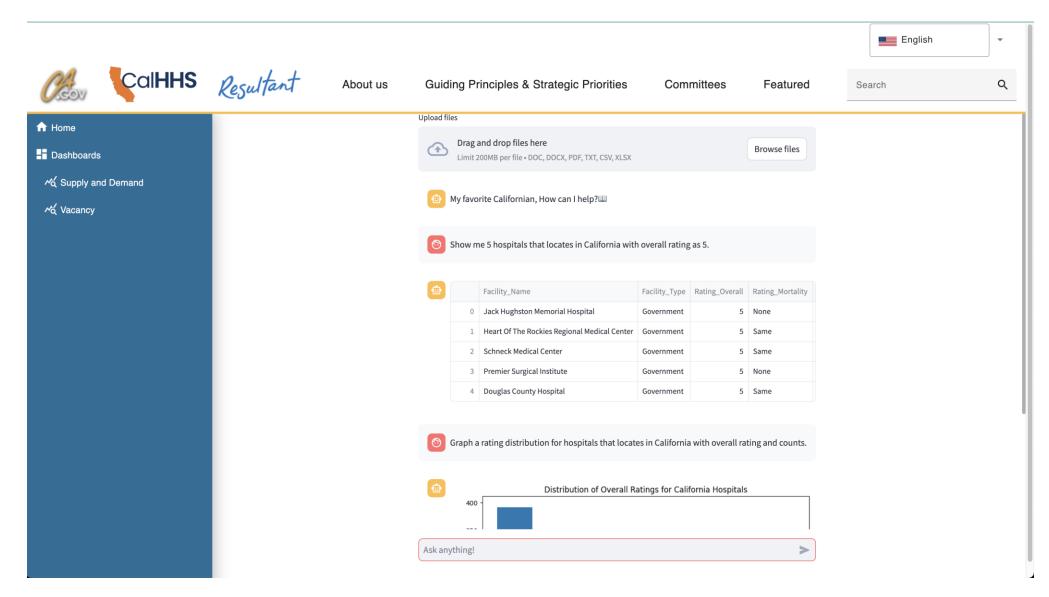

Increased Provider Engagement and Efficiency

Questions?

Appendix

Resultant was born in technology and data, built to drive outcomes

TECH FIRST

From the very start, we have helped our clients make their technology a strategic asset, not a liability.

MARKET FOCUS

We began to focus our work of helping organizations accomplish their mission through the more effective use of data and technology on two key markets: SMB and Government, the latter of which evolved to state and local agencies.

FUNCTIONAL EXPERTISE

Design thinking helped us flesh out and formalize the way we were solving root cause issues for clients and driving positive outcomes, which led us to offer more humancentric services like change management in addition to data and technology.

OUTCOMES ALWAYS

We formalized our problem-solving approach and committed to always producing outcomes for clients.

MISSION AND VALUES

We documented the values we were already exhibiting—those that helped us fulfill our mission more effectively—purposeful empathy, outcomes focus, fearless problem solving, passionate expertise, and thoughtful collaboration

VERTICAL EXPERTISE

Experts from industry began to join Resultant and add to our curiosity and deep expertise in functional and technical pursuits. This third dimension allowed us to serve clients better and more rapidly because many of our people have been there before.

About Us

450+ Team Members

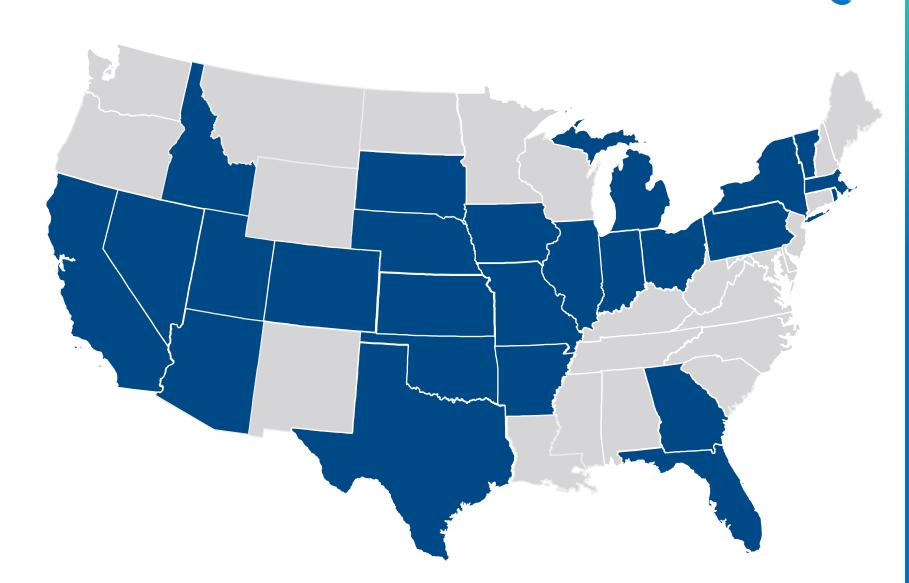

Our team of intrepid experts, based across the US, includes technical experts like Data Scientists to functional Consultants to leaders from industry. We bring tenure, depth, and breadth as we work alongside our clients to envision and implement mission-critical solutions.

Public and Private Sector

Our work across public agencies and private businesses allows us to apply best practices across industry and sector.

National Coverage

We have helped public sector clients achieve their missions and capture outcomes in 24 states.

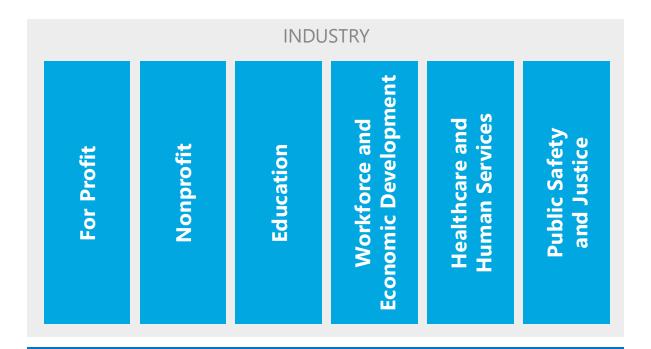

Our services help you deliver the outcomes you seek

Functional	Organizational Advancement	We blend a team of consultants, subject matter experts, and change and delivery management professions to ensure you achieve your roadmap for the future.
Technologies	Data Analytics	Our teams of advanced data scientists, data engineers, analysts, and subject-matter experts implement effective data solutions that drive action.
	Technology Acceleration	Engineers, analysts, and leaders help you design, implement, operate, and optimize technology solutions, sometimes employing solution-agnostic packaged technology for the betterment of our clients.
Managed Services	Data & Technology Managed Services	We provide strategic day-to-day technical services to achieve long-term transformation and support for tech and data.

Resultant is organized to support our unique approach

Functional (Change Management, Data Governance)

Technical (Data Science & Engineering, Applications, Architecture)

Managed Services (Cloud, Cyber, vClO)

FROM VISION THROUGH MAINTENANCE, WE HAVE YOU COVERED

Resultant partners with clients to help them achieve their missions and capture positive outcomes, blending our teams to empower meaningful change.

We start by listening to our clients, understanding their needs, and involving them in achieving the best outcome. Those outcomes are enabled by our expertise in data analytics, technology, industry acumen, and functional expertise.

Our team understands that behind every business or technology problem there are people experiencing the challenge firsthand. That's why we often partner with clients to envision, build, then run solutions that improve technology *and* enable people. We collaborate with clients from vision to creation through evolution
